
Standard Leak Survey & Repair Application

Does your facility qualify?

- Privately-owned, non-residential facility (public facilities are eligible through the Illinois Energy Now program; visit www.illinoisenergy.org for details)
- Electric delivery service rate DS2, DS3, DS4, DS5, or DS6 and Rider EDR surcharge on Ameren Illinois bill for all electric projects

Does your project qualify?

- Project goal is to make compressed air systems more energy efficient by identifying and repairing leaks
- Estimated project completion date is on or after June 1, 2016, and by May 31, 2017

*Three other compressed air applications are available – Compressed Air Retro-commissioning, Standard Specialty Equipment – Compressed Air, and Custom Applications. Please contact a program representative to determine which would be best for your facility.

What you should know before beginning:

- Preapproval is **required** for ALL Standard Application projects requesting more than \$10,000 of incentive money. Customers applying for preapproval should complete this form using a good faith estimate to determine the estimated incentive amount. If your incentive amount changes as you conduct your project, contact program representatives to discuss the updated incentive amount. Do not make any financial commitments (including generating purchase orders) until receiving an official preapproval letter.
- Each Compressed Air Leak Survey & Repair application may apply for up to \$20,000 once per year, per facility.
- The leak survey must be performed by an outside contractor to be eligible. The outside contractor may be an Ameren Illinois Energy Efficiency Program Ally or a compressed air contractor with adequate experience. If your contractor is not a Program Ally, please ensure they contact an Ameren Illinois Energy Efficiency representative to review program requirements prior to the start of work.
- Application paperwork can be submitted via email or hard copy. Do not submit “zip” files. You will receive a confirmation email within two business days of submitting a complete and correct application.

Participation instructions:

- **Step One:** Determine if your project requires preapproval. If the expected total incentive request is over \$10,000, preapproval is required.
- **Step Two, Track A:** If preapproval is required, submit the application for preapproval and do not make any financial commitments or generate purchase orders until a preapproval letter is issued.
- **Step Two, Track B:** If preapproval is not necessary, an application for “funds reserved” may be submitted, or the survey may begin.
- **Step Three:** Once the survey is complete, applicants must repair identified leaks and submit the Incentive Payment Request Form (with all documentation requested on that form) within 60 days. Survey completion is defined as the survey invoice date. Notify a program representative if the project deadline may not be met – failure to do so may prevent approval. Applications are reviewed and approved projects paid within 60 days of approval.
- **Step Four:** Program staff may conduct a post installation verification inspection upon receiving final application paperwork.

*Detailed, step-by-step instructions, FAQs, and other helpful information are available in the Application Guide (www.ActOnenergy.com/portals/0/business/forms/application-guide.pdf).

<ul style="list-style-type: none"> Customer must repair at least <u>one</u> leak for every five connected compressor horsepower. If less than one leak per every five horsepower is identified, all identified leaks must be repaired to qualify. If an individual leak is deemed irreparable in a project that requires all identified leaks to be repaired, the Ameren Illinois customer may submit a written explanation and the irreparable leak will be allowed to remain. Customers must leave leak tags in place for a minimum of 30 days after the application is submitted to allow Ameren Illinois Energy Efficiency Program representatives to verify the repair, if needed.
